IDWAL

Inspection insight. Data advantage.

Driving value for your business

Idwal ID is a condition improvement programme delivering **defect management, fleet analytics** and **benchmarking** through detailed ship inspections and reports with dynamic data on an intuitive platform.

Used consistently across your fleet, Idwal ID can help you **save money and time, take effective action** and **demonstrate excellence** within your organisation or externally.

Regular inspections across your fleet with our expert surveyors, and access to the Idwal ID platform.

The Idwal ID platform **integrates** all aspects of the inspection and condition monitoring process

Allowing you to **interrogate** the data provided

Giving you **insights** into overall fleet integrity and specific issues

INSPECTION

- Independent vessel-level report
- Industry-best checklist
- Idwal Grade®

SURVEYOR

- Surveyor management & quality assurance
- Continuous Professional Development
- Idwal ID-approved surveyors

PLATFORM

- Aggregated defect management
- Fleet and asset-level trending & benchmarking
- Rapid access to all inspection info in one secure place

Live Demo

WORKING WITH THE BEST ACROSS THE INDUSTRY

IDWAL ID

WHAT THE OUR CUSTOMERS SAY

IDWAL ID

Idwal ID is a great tool in our fleet assurance toolbox to protect our license to operate. It adds a layer of oversight for keeping track of our global fleet condition, identify opportunities for improvement, and benchmark with a representative sample of vessels.

Martin Krafft
Vice President, Fleet Management, Fednav

TUFTON

"Implementing Idwal ID has taken the burden from Tufton's technical team with much of the pressure alleviated by the Idwal team, who liaise with the vessels and their managers to facilitate the inspections globally.

The Idwal ID platform is also a valuable part of the programme for us, as it gives us impartial oversight on the condition of our fleet, enables us to see how our managers are performing, and allows us to identify and rectify defects quickly and efficiently".

Capt. Parani VS
Vice President – Marine, Tufton Asset Management

Driving value for your business

WORKFLOW OPTIMISATION

Save time and money

- Streamline operations and inspection scheduling
- Resolve defects quickly and efficiently
- Increase vessel uptime

GREATER VISIBILITY

Take effective action

- Improve PSC and vetting performance
- Prioritise preventative maintenance campaigns
- Improve safety and reduce risk

INDEPENDENT VALIDATION

Demonstrate excellence

- Push team performance
- Substantiate OPEX data and standards
- Maximise charter rates and vessel value
