

IDWAL PRE-SIRE 2.0 INSPECTION

Be Prepared for the New SIRE 2.0 Standard

What is SIRE 2.0?

SIRE 2.0 represents a significant evolution in tanker vetting, moving from the traditional checklist approach to a dynamic, risk-based inspection regime. Developed by OCIMF, this new standard features:

- 550+ potential inspection questions customised based on vessel type and risk profile
- Core questions plus rotating questions that change with each inspection
- Real-time digital validation and photo evidence requirements
- Direct crew competency assessments through interviews
- Enhanced scrutiny of maintenance records and digital documentation

Why Choose Idwal Pre-SIRE 2.0 Inspections?

Our targeted pre-vetting service helps you identify and address compliance gaps before official inspections occur. We offer:

- **Expert Assessment:** Our experienced inspectors conduct comprehensive evaluations using the same standards applied in official SIRE 2.0 inspections.
- **Flexible Inspection Options:**
 - Comprehensive: All core questions plus high-priority rotational questions in a single visit
 - Progressive: Three-inspection programme, covering all questions over time
 - Targeted: Customised inspections addressing specific areas of concern
- **Actionable Reporting:**
 - Clear deficiency identification with photographic evidence
 - User-friendly Excel checklist format with dedicated observation list
 - Direct report delivery for immediate action
 - Onboard close-out meeting to prioritise corrective actions
- **High-Quality Independent Reports:** our inspection reports are accurate, detailed and comprehensive, ensuring that you get the insight you need on the issues you may face during a vetting inspection.

Who Needs this Service?

Pre-SIRE 2.0 inspection is ideal for:

- Crude oil tankers
- Product tankers
- Chemical tankers
- LNG and LPG carriers
- Shuttle tankers
- Oil/Bulk/Ore (OBO) tankers

The Idwal Advantage

With unpredictable inspection content, crew competency assessments, and enhanced digital compliance requirements, SIRE 2.0 presents significant challenges. Our pre-vetting service helps you navigate these challenges, reducing the commercial risk of failed inspections.
